Subject: 'Bound with' notes

Hi, Meg

Thought I'd email you for your records. My understanding is as follows:

- 1) Record with item attached – notes go only in the item record; no need to add name of the earlier or later title, eg.,

The screenshot shows a library catalog record for 'Entomological news, and proceedings of the Entomological section of the Academy of Natural Sciences'. The record is for holding 1357887 (bib 1201904) and item 4717737. The MARC record is displayed in a table format, and the item record is displayed in a form format.

Tag	I1	I2	Subfield Data
014	1		1a AES-3031
852	0		1b wd wd1 1h QL461 1i .E615
866	0		18 1 1a v. 1(1890)-v. 35(1924) 1x M3068806-0

The item record shows the following fields:

- Title: Entomological news, and proceedings of the Entomological section of the Academy of Natural Sciences
- Location: WOODWARD stor (WD1)
- Call #: QL461 .E615
- Barcode: 39424047924227
- Temp. Loc.:
- Perm. Loc.: WOODWARD stor (WD1)
- Temp. Type:
- Item Type: Journal (non-circulating)
- Media Type:
- Enum: v.35-36
- Chron:
- Year: 1924-25
- Caption:
- Free text: <Includes v.36 of later title>
- Spine:

- 2) Record without item attached – the notes go in the 866 (because there's no item to put them in), eg.,

The screenshot shows a library catalog record for 'Entomological news'. The record is for holding 1340234 (bib 1189408). The MARC record is displayed in a table format, and the item record is displayed in a form format.

Tag	I1	I2	Subfield Data
014	1		1a AER-0302
852	0		1b wd 1h QL461 1i .E615
866	0		18 1 1a v. 36(1925)-v. 105(1994) 1x M9689498-0
866	0		18 1 1a v. 36(1925) bound with earlier title

The item record shows the following fields:

- Title: Entomological news
- Location:
- Call #:
- Barcode:
- Temp. Loc.:
- Perm. Loc.:
- Temp. Type:
- Item Type:
- Media Type:
- Enum:
- Chron:
- Year:
- Caption:
- Free text:
- Spine:

Generally, as simple as possible is the goal. The summaries should correspond with the bib record; the notes explain the discrepancies.

Cheers,

Elaine.
